

EVORA

PRI Principles for
Responsible
Investment

PRI Reporting

Promoting transparency &
disclosure in investments.

What is PRI?

PRI is a global network of investors, supported by the United Nations. It promotes transparency and disclosure in investments.

Signatories are encouraged to incorporate environmental, social, and governance (ESG) factors into their decision-making and disclose their performance.

PRI's reporting framework enables investors and property owners to demonstrate their commitment to responsible investment practices and track their progress.

What is the objective?

PRI's six guiding principles aim to promote a more sustainable global financial system.

These flexible, voluntary guidelines enable investors to incorporate ESG challenges into their investment practices to mitigate risks, identify opportunities, and create long-term value for their stakeholders.

Six guiding principles

- 1** We will incorporate ESG issues into our investment analysis and decision-making processes.
- 2** We will be active owners and incorporate ESG issues into our policies and practices.
- 3** We will seek appropriate disclosure on ESG issues by the entities in which we invest.
- 4** We will promote acceptance and implementation of the Principles within the investment industry.
- 5** We will work together to enhance our effectiveness in implementing the Principles.
- 6** We will each report on our activities and progress towards implementing the Principles.

Key facts

- Annual reporting is usually mandatory for all signatories (not in first year grace period). Those signatories that do not report are at risk of de-listing.
- **PRI made the decision that for 2024, reporting will be voluntary for signatories who publicly reported in 2023, and those signatories for which 2024 would be their grace period. Reporting in 2024 is only mandatory for signatories that reported in 2023 but did not meet the minimum requirements, and for those who joined in the last 2 years and did not complete public voluntary reporting in 2023.**
- Assessment taken at organisational/entity level (not fund level).
- Currently no evidence required (although signatories may be subject to audit so we recommend keeping an audit trail).
- No overall organisational score given, instead individual module star ratings are provided.
- Minimal ESG performance data input (focus on strategy and risk management processes).
- Reporting portal open May-July.

What has been updated?

The January 2023 PRI update included:

- Fewer indicators for a more streamlined reporting framework
- Restructured modules, including a new Policy Governance & Stewardship (PGS) module that replaces the Investment & Stewardship (ISP) module.
- Incorporation of human rights as a key component of the new Policy, Strategy & Governance (PSG) module.
- Creation of a separate reporting module for confidence-building measures at the end of the assessment, distinct from the ISP module.
- Improved clarity throughout the framework for better understanding and accessibility.
- Revision of the terminology used to ensure that indicators are not too prescriptive nor vague.

The January 2024 PRI update includes:

- Pre-filling of responses based on the 2023 survey introduced.
- Approximately 90% of questions remain unchanged from 2023, with 33 indicators updated/amended.
- PRI platform improvements.

“

EVORA has been a strong partner as we continue to develop our ESG policy and actions. They have a deep understanding of the real estate markets; this was a critical piece in their support of our TCFD agenda as we seek to further embed ESG principles and climate resilience across all elements of the investment cycle.”
