

Integrated Solution Offering

A Unified Approach to Value Creation and Risk Management

At EVORA, we understand that sustainability isn't a standalone initiative - it must be embedded across the full lifecycle of investment, asset management, and reporting. That's why our five core service areas work together to help real asset investors not only meet compliance obligations, but unlock long-term value, enhance resilience, and deliver on sustainability commitments.

Our offering is designed as a connected journey. Whether you engage with us in one area or across all five, the integration of our expertise is what sets EVORA apart.

Sustainability Strategy

We begin by helping you define and align your sustainability ambitions. Whether you're launching a new fund, repositioning an asset, or refreshing your sustainability policy, our team ensures your goals are clear, measurable, and actionable.

Outcome: A credible, tailored roadmap that supports your investment thesis and meets stakeholder expectations.

Sustainable Finance

We then ensure your capital strategies support your sustainability ambitions. By aligning sustainability goals with lending and investment practices, we help you manage risk, enhance transparency, and potentially unlock preferential finance terms.

Outcome: Financial structures that reinforce - not undermine - your sustainability goals, boosting both credibility and value.

Asset Assessment

With your strategy and financing aligned, we help you assess where you stand. Our data-driven asset and portfolio-level assessments identify performance gaps, climate-related risks, and opportunities for decarbonisation and value creation.

Outcome: Informed decision-making, underpinned by independent analysis and strategic alignment.

Asset Optimisation

Armed with insight we move into implementation. From decarbonisation programmes to energy upgrades and certification pathways, we work with partners and teams on the ground to turn strategy into financial gain.

Outcome: Measurable improvements in asset performance, delivering operational savings and strengthening value across the portfolio.

Reporting and Disclosure

Finally, we help you communicate progress with credibility. Our combined tech and consultancy offering ensures your sustainability data is accurate, transparent, and aligned with leading frameworks such as GRESB, SFDR, INREV, and CSRD.

Outcome: Streamlined, audit-ready sustainability reporting that builds stakeholder trust and supports long-term performance tracking.

A Unified Approach to Value Creation and Risk Management

Why It Matters to You

Consistency and Clarity

With EVORA, there's no disconnect between strategy, data, action, and capital. We help you tell a cohesive sustainability story and one that resonates with investors, regulators, and tenants alike.

Efficiency and Impact

Working with a single, expert partner across these areas eliminates duplication, speeds up execution, and ensures nothing gets lost between teams or workstreams.

Scalability

Start where you need to and scale up. Whether you're at the beginning of your journey or optimising a mature programme, our services meet you where you are and where you need to get to.

Unlocking Value with EVORA

Clients who leverage the full scope of our services benefit from a looped system where strategy informs measurement, insights shape action, and performance underpins finance. Each step strengthens the next and together, they future proof your investments.
