

# Reporting & Disclosure

## Report with confidence, disclose with impact.

EVORA enables organisations to capture, validate and communicate sustainability performance through globally recognised frameworks — meeting compliance obligations, satisfying investor expectations and future-proofing your business.

## What we offer

### We provide an integrated approach that includes:

- Automated data collection for real-time, accurate energy and sustainability metrics
- SIERA – our proprietary platform for streamlined, audit-ready reporting
- Expert consulting to help clients interpret and understand their data
- Preparation of disclosures tailored to leading standards, including GRESB, INREV, EPRA, CSRD, and bespoke formats based on fund or company strategy

## The value it brings

### We combine:

- Automation and consulting under one roof, giving you the most accurate, consistent, and efficient outcomes
- Deep sector knowledge that ensures your disclosures reflect both the technical detail and the strategic intent behind them

**We ensure your sustainability data doesn't just meet requirements – it builds trust and drives performance.**

## How this applies to you

**If you're navigating multiple stakeholder expectations or regulatory requirements, our services are especially relevant. We help you:**

- Deliver on reporting commitments
- Mobilise and organise portfolio-level data
- Reduce the burden, cost and complexity of reporting
- Meet compliance standards while driving value through transparency

## Why EVORA?

**Where others separate software, consulting and data, we deliver all three seamlessly. EVORA offers:**

- A single team with unmatched expertise in real assets
- Proven technology for ease, compliance, and consistency
- A nuanced understanding of why disclosure matters

**We help you avoid not only regulatory risks but also reputational ones, ensuring your sustainability promises to investors are credible and achievable.**

## Client case study

**EVORA helped AEW UK streamline sustainability reporting by developing a tailored Environmental Management System and integrating SIERA. This enabled efficient data capture, compliance across key frameworks, and improved performance transparency.**

### Ready to unlock the value of sustainability data?

Let's turn your reporting from a compliance exercise into a strategic asset. [Contact us](#) today to explore how we can streamline your reporting and strengthen stakeholder confidence.
