Arc Performance Certificates

4 Quick Checks to Get Your Portfolio Ready

Arc Performance Certificates are a scalable, cost-effective way to benchmark and recognise sustainability performance across portfolios. Developed by GBCI through the Arc platform, they provide digital certificates valid for one year across five key categories: energy, water, waste, transportation and human experience.

The 4 Quick Checks

Benchmark Coverage
Do you have at least 12 months of complete, quality utility data (energy, water, waste, where applicable)?

Verified Data Quality
Is your data accurate, consistent, and aligned with meters and floor areas?

Up-to-Date Inputs
Are occupancy, operating hours, and floor areas current so scores reflect actual building use?

Category Choice
Have you chosen your certificate categories and confirmed you can meet the requirements of each?

EVORA: Your Partner for Arc Performance Certifications

We assure a seamless journey guiding you through the process:

- Data validation to ensure accuracy and compliance with Arc requirements
- Transposing data into Arc Performance format
- Completion of Arc Performance Templates ready for upload
- Addressing outliers identified by Arc Performance data tests
- Coordination with Arc team to ensure certificates are produced for GRESB

Ready to check your readiness?

With EVORA's guidance, your portfolio can confidently pursue Arc Performance Certificates.
