

CLIMATE RESILIENCE SERVICES - STRATEGY & DISCLOSURE

Including Taskforce on Climate-Related Financial
Disclosures (TCFD)

WHAT IS CLIMATE RESILIENCE?

Climate resilience is the ability to **identify, assess, and manage risks and opportunities** arising from a changing climate and the shift to a low carbon economy. An effective climate resilience strategy will enable you to:

1 Evaluate and quantify climate risk to understand your exposure and vulnerability.

- Emerging legislation
- Changing market demand
- Evolving expectations
- Emerging resilient technology
- Capital cost and availability

- Physical climate hazards
- Transition risks
- Climate-related opportunities

2 Proactively respond to climate-related transition risks and opportunities.

- Wind and Storm
- Heat Stress
- Water Stress
- Flooding
- Wildfire

3 Adapt and protect your business and assets from increasing physical climate risks

Yanna Badet

Strategic Lead, Climate Resilience - Strategy & Disclosure, EVORA

“We advise clients on critical actions to take when faced with the accelerating pace of climate change and potential for shocks. Climate resilience enables organisations to ‘bounce back’, recover more quickly, and even thrive after shocks to the system.”

Meghan Johnson
Technical Lead, Climate
Resilience - Strategy &
Disclosure, EVORA

“Climate risk is already here and can’t be ignored. At EVORA, we translate climate awareness into action to futureproof portfolios and investment strategies.”

WHY DOES CLIMATE RESILIENCE MATTER TO INVESTORS?

Climate resilience is a fundamental aspect for futureproofing business and investment strategy. Forward planning to mitigate risks, such as shifting market expectations and incoming legislative requirements, will help protect investments from the financial impacts of climate change.

GOOD BUSINESS SENSE

More and more businesses choose **proactive climate risk assessment and management** to build a resilient business strategy and protect their investments from climate change.

REGULATORY COMPLIANCE

Many governments are introducing **obligatory climate-related financial disclosures** based on the **TCFD** framework.

FIDUCIARY RESPONSIBILITY

Investors rely on asset managers for climate-related information for disclosure. EVORA advises stakeholders at all levels how to **manage climate-related information for disclosure.**

HOW DOES CLIMATE RESILIENCE IMPACT REAL ESTATE?

"The financial impact of climate change is not yet fully realised. We can identify climate risks that we know are increasingly material for real assets which, by nature, are particularly exposed to physical hazards and carbon transition risks."

Oliver Pye, Strategic Advisor, Climate Resilience - Strategy & Disclosure, EVORA

EVORA'S CLIMATE RESILIENCE SERVICES

Phil Fieldhouse

Climate Resilience - Strategy & Disclosure Programme Manager, EVORA

“EVORA is truly a ‘centre of excellence’ for climate resilience in real assets. I’m proud to lead our delivery program of end-to-end services that advance and embed climate resilience within our client organisations”.

TRUSTED RELATIONSHIPS

“EVORA has been a strong partner as we continue to develop our ESG policy and actions. They have a deep understanding of the real estate markets; this was a critical piece in their support of our TCFD agenda as we seek to further embed ESG principles and climate resilience across all elements of the investment cycle.

Jonathan Flaherty, Global Head of Sustainability and Building Technology Innovation, Tishman Speyer

“EVORA directly oversaw the advice, preparation and coordination to submit the HECF portfolio responses to the GRESB survey for the first time. The team’s help was invaluable; they always made themselves available to respond to our many questions.

They have a very clear understanding of the GRESB survey and what the meaning of the questions was while orientating us in responding to them in the best way. The EVORA team was able to work with the various key people in our local and central platform in order to extract the necessary information.

It is a real pleasure to work with the EVORA team.”

Daniel Chang, Managing Director, Hines

“EVORA’s ability to deliver practical solutions on the ground across multiple jurisdictions as well as engage at strategic level with our Board sets them apart from other providers in this space. They have become a trusted advisor to Patrizia”.
